Peer reviewWorkshop 3, on pn222en

by ms224cq/Max Decroy Strandlund

Usage, bugs and diagrams

Did not manage to run the program. Did not find informaiton about how to compile, but probably that is more due to my inexperience with java than due to the coders.

Did not find an updated class diagram.

Code review

Dependency between controller and view are well handled, no dependencies in the wrong direction.

The strategy pattern seem to be correctly used, both in Soft17 and for other game variations. (1, chapter 26.8)

Did not find duplicate code.

Theß update is on todo, but is already on the way. (1, chapter 26.10)

If finnishing implemenation of Update() within controller/PlayGame, and providing an updated class diagram, the design/implementation surely should pass the grade 2 criteria.
